

FRAMISITALIA

Since 1979 global provider of innovative, high quality and unique heat-bonding solutions. The only Company that offers both the heat-welding tapes/films and the machines to apply them.

MISSION

Our mission is to be the leading provider of innovative, high quality and fully integrated solutions in thermoadhesive polyurethane applications with a 360° approach to the technology by supplying films, tapes and machines to international top brands and their partner manufactures.

SUSTAINABILITY

Framis Italia takes care of the environmental impact of its actions, and in particular in how preventing and investing today can guarantee a better tomorrow. In order to achieve this mission, a series of sustainable activities have been implemented, from the use of renewable energy, to the improvement of production processes, to the manufacturing of safe products in accordance to the most demanding international standards, to the creation of new green products and machines.

NOSO®

Framis Italia is the only Company that designs and develops both the heat-welding tapes and the machines that apply them. This unique project, called "NoSo®", is the only fully guaranteed system for seamless joining and welding, from production to application. Further quality certification is offered by the NoSo® identity tag which guarantees that the products purchased have been made to the highest quality standards.

NOSO® MACHINES

A complete range of heat-welding and heat press machines, to create countless decorative applications and stitchless garment construction. Very user-friendly and environmentally efficient, our machines can be easily customized to meet the customers' demands and develop tailor-made solutions.

NOSO® TAPES & FILMS - AREAS OF USE

A complete range of heat-welding and heat press machines, to create countless decorative applications and stitchless garment construction. Very user-friendly and environmentally efficient, our machines can be easily customized to meet the customers' demands and develop tailor-made solutions.
